

ANDREW HERCULES

Developer. Designer.
Digital Strategist.

PROFILE

After spending the past three years working in a print and online marketing role at the University of Toronto and providing marketing consulting services to a range of organizations, I decided to embark on a new career path and enrolled in the 12-week full-time web development boot camp at Makers Academy. Having recently completed the program, which included working with a broad range of programming languages, tools, and frameworks, I am seeking a junior developer, designer, or digital strategist role.

When I am not coding or reading up on technology marketing, you will find me at a tennis court, a hot yoga studio, or at a circus arts school tumbling and hanging from the ceiling.
